

KTable Count()

KTable Count

Problem Statement

Create a topic named person-age and send the following messages.

Abdul:26

Prashant:41

John:38

Milli:26

Create a Kafka Streams application to count the number of persons by age.

Age	Count
26	2
38	1
41	1

Send following update message and compare the results with below table.

Prashant:42

Age	Count
26	2
38	1
42	1
