

A person is working on a laptop. A small potted plant is on the desk. The text "Creating Your First KTable" is overlaid on the image.

Creating Your First KTable

Working with KTable

Problem Statement

Create a Kafka topic that will receive a key-value pair of stock ticks.
Send Following messages to the topic.

HDFCBANK:1250.00

TCS:2150.00

KOTAK:1570

HDFCBANK:1255.00

HDFCBANK:

HDFCBANK:1260

Create Kafka Streams Application for the following:

1. Read the topic as KTable.
2. Filter out all other symbols except HDFCBANK and TCS.
3. Store the filtered messages in a separate KTable.
4. Show the contents of the Final KTable.
