

# Kafka Streams

## Real-time Stream Processing

by

**LEARNING JOURNAL**

# What is Kafka?

# What is Kafka?

## Broker Responsibilities

1. Receive messages from the producers and acknowledge the successful receipt.
2. Store the messages in a log file to safeguard it from potential loss.
3. Deliver the messages to the consumers when they request it

Apache Kafka is a horizontally scalable, fault-tolerant, distributed streaming platform.

# What is Kafka?

1. Kafka Storage Architecture
2. Kafka Cluster Architecture
3. Work Distribution Architecture

Apache Kafka is a horizontally scalable, fault-tolerant, distributed streaming platform.
